BEDE EVENTS

Green Credentials

Here at BEDE Events, we are working to improve our sustainability and reduce our carbon footprint wherever possible.

We want to work with you, our event caterers, who will, I am sure, be willing to work with us and achieve these goals.

Continuing from 2025, in 2026 we will be

- Removing the use of polystyrene and moving towards biodegradable materials.
- Removing single use plastic in bottles, packaging etc and use biodegradable products where possible such as cups/cutlery, etc.
- Using recycled paper for serviettes, disposable hand towels.
- Recycling all cardboard, plastic and glass.
- Reducing waste at every opportunity.
- Reducing food waste by not over stocking, and by re distributing any excess foods/stock where possible.

We understand that some waste is unavoidable but, if we all work to remove any single use plastics, reduce our ‘on event’ rubbish and use biodegradable products where possible, we will aid cause. BEDE Events use waste contractors that are 0% landfill.

By applying to our event, you are agreeing to these terms and are willing to help us improve our sustainability.
